

Cooling Tower Services and Maintenance Solutions

MARLEY®

One Call. One Source. One Solution.

SPX Cooling Technologies aftermarket

More than service—service and maintenance solutions.

SPX Cooling Technologies is part of the entire cooling tower life cycle—from design and manufacturing to service and reconstruction—for more than a century.

With such a unique perspective and unparalleled knowledge, SPX Cooling Technologies looks beyond quick fixes to provide complete service and maintenance solutions—proven, convenient, and value-driven approaches that maximize thermal performance...as well as maintenance budgets.

Whether you own, operate or maintain cooling towers, SPX is the only call you'll need to make for total cooling tower care and complete peace of mind.

Services Overview

Aftermarket offerings across the cooling tower life cycle.

No matter your cooling tower's age, condition, needs or even brand, SPX offers the unique knowledge, experience, and resources necessary to help it perform like new.

From routine maintenance to complete refurbishment—and every stage in between—SPX is your one-stop resource to optimize your operation and make the best use of your maintenance budget.

Genuine Marley parts

- Stocked distribution center
- Global sales representation
- Consistent performance and quality
- Components designed and manufactured to work together

Technical services

- Gearbox diagnostics and repair
- Thermal performance testing
- Material testing
- Mechanical systems diagnostics
- Fill fouling evaluation analysis
- Specification development
- Operator training

Refurbishment

- Turn-key construction
- Project management
- Engineering services

Marley Plan™ service agreements

- Cooling tower inspections
- Comprehensive inspection reports
- Preventive maintenance
- Service contracts
- Asset management programs
- HSE ACOP L8 compliant cleaning and disinfection

Original equipment manufacturer performance for every cooling tower brand

With plant operation relying on your cooling tower performance, selecting Marley OEM parts makes long-term cooling performance sense.

The potential long-term reduction in performance and reliability — as well as increases in costs and risks of losing heat transfer efficiency — could quickly undermine any initial savings that other part brands may offer.

Because we design and manufacture components exclusively for cooling towers, Marley parts are among the highest quality replacement products available, providing many years of consistent, reliable service.

Parts and components

- Quality engineered
- Precision crafted
- Available for most cooling tower brands

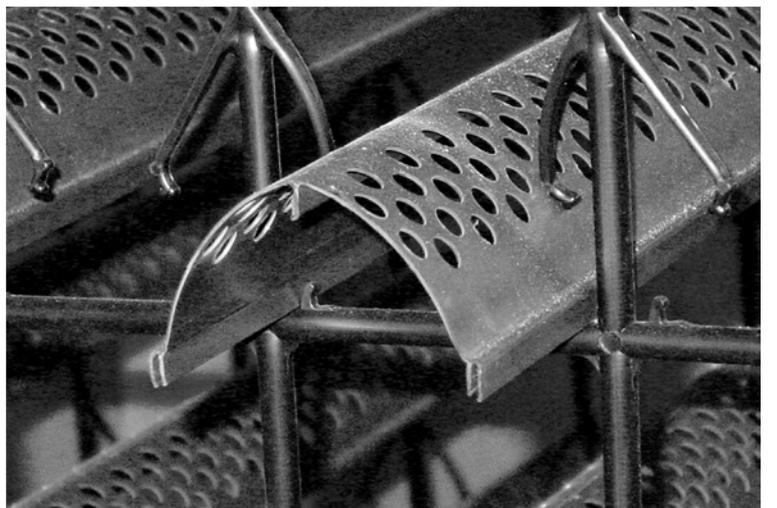

You can count on us for your cooling tower parts. We stock all primary cooling components, including:

- Fans
- Gear boxes
- Driveshafts
- Belt drive components
- Fan cylinders
- Fill
- Nozzles
- Drift eliminators
- Valves
- Structural components

We are uniquely qualified to address repair and parts replacement for cooling towers regardless of age or manufacture.

Marley performance and quality

Trust the brand with rigorous life cycle testing at dedicated research facilities.

Technical Services

Knowledge in action

When you need consultative technical services for your cooling towers – whether to diagnose or upgrade individual units or entire systems – SPX Cooling Technologies ready.

You will find a full suite of technical services available to help ensure your operation is optimized and compliant. Where applicable, our technicians and methodologies abide by CTI, Eurovent and HSE ACOP L8 and HSG 274 guidelines; and regardless of process or procedure, SPX staff strives for the highest standards of quality and accuracy.

Ultimately, what SPX offers is peace of mind that only a century of cooling tower experience can bring. Because we design, engineer, manufacture and service leading cooling tower brands, it only stands to reason we understand them better, inside and out.

QUANTIFY ECONOMIC VALUE

Measure the real-world value of enhanced cooling and operations improvement options.

REDUCE END-USER RISK

Proactive maintenance plans delivering reliable cooling for your site.

LEVERAGE SPX COOLING TECHNOLOGIES KNOWLEDGE

With decades of experience, we can deliver solutions and value—not just products.

ENHANCE SYSTEM DESIGNS

We understand how to optimize individual components to achieve the best overall performance.

Geareducer Service

Geareducers reborn

SPX Cooling Technologies designs and manufactures Marley Geareducers for cooling towers in HVAC, industrial and power plant applications. For over 75 years, the Marley Geareducer® has set the standard for excellence in performance and durability. Every one of over 100,000 units installed in the field embodies our commitment and attention to quality standards in development, production and performance.

EXPANDED OFFERING – GEAREDUCER SOLUTIONS

In addition to new replacement Geareducers SPX factory-trained technicians with years of experience can repair your existing Geareducer or provide a factory rebuilt Geareducer. With our Geareducer Solutions program, you can be confident SPX has a solution regardless of your needs.
